

## LGZS25012/LGZS25008

四轴数控龙门加工中心  
4-axis CNC Gantry Machining Center通过优化的结构设计实现革新性的超长加工范围，有效加工长度可达 25 米。  
Max processing length reach to 25m.

主要加工精度  
重复定位精度: ±0.03 mm 定位精度: ±0.1 mm  
表面粗糙度: Ra0.2μm 轴承垂直度: 0.1/100mm  
直度: 0.1/100mm

Main machining accuracy  
Repeat positioning accuracy: ±0.03 mm Positioning accuracy: ±0.1 mm  
Surface roughness: Ra0.2μm Axial perpendicularity: 0.1/100mm  
Rigidity: 0.1/100mm

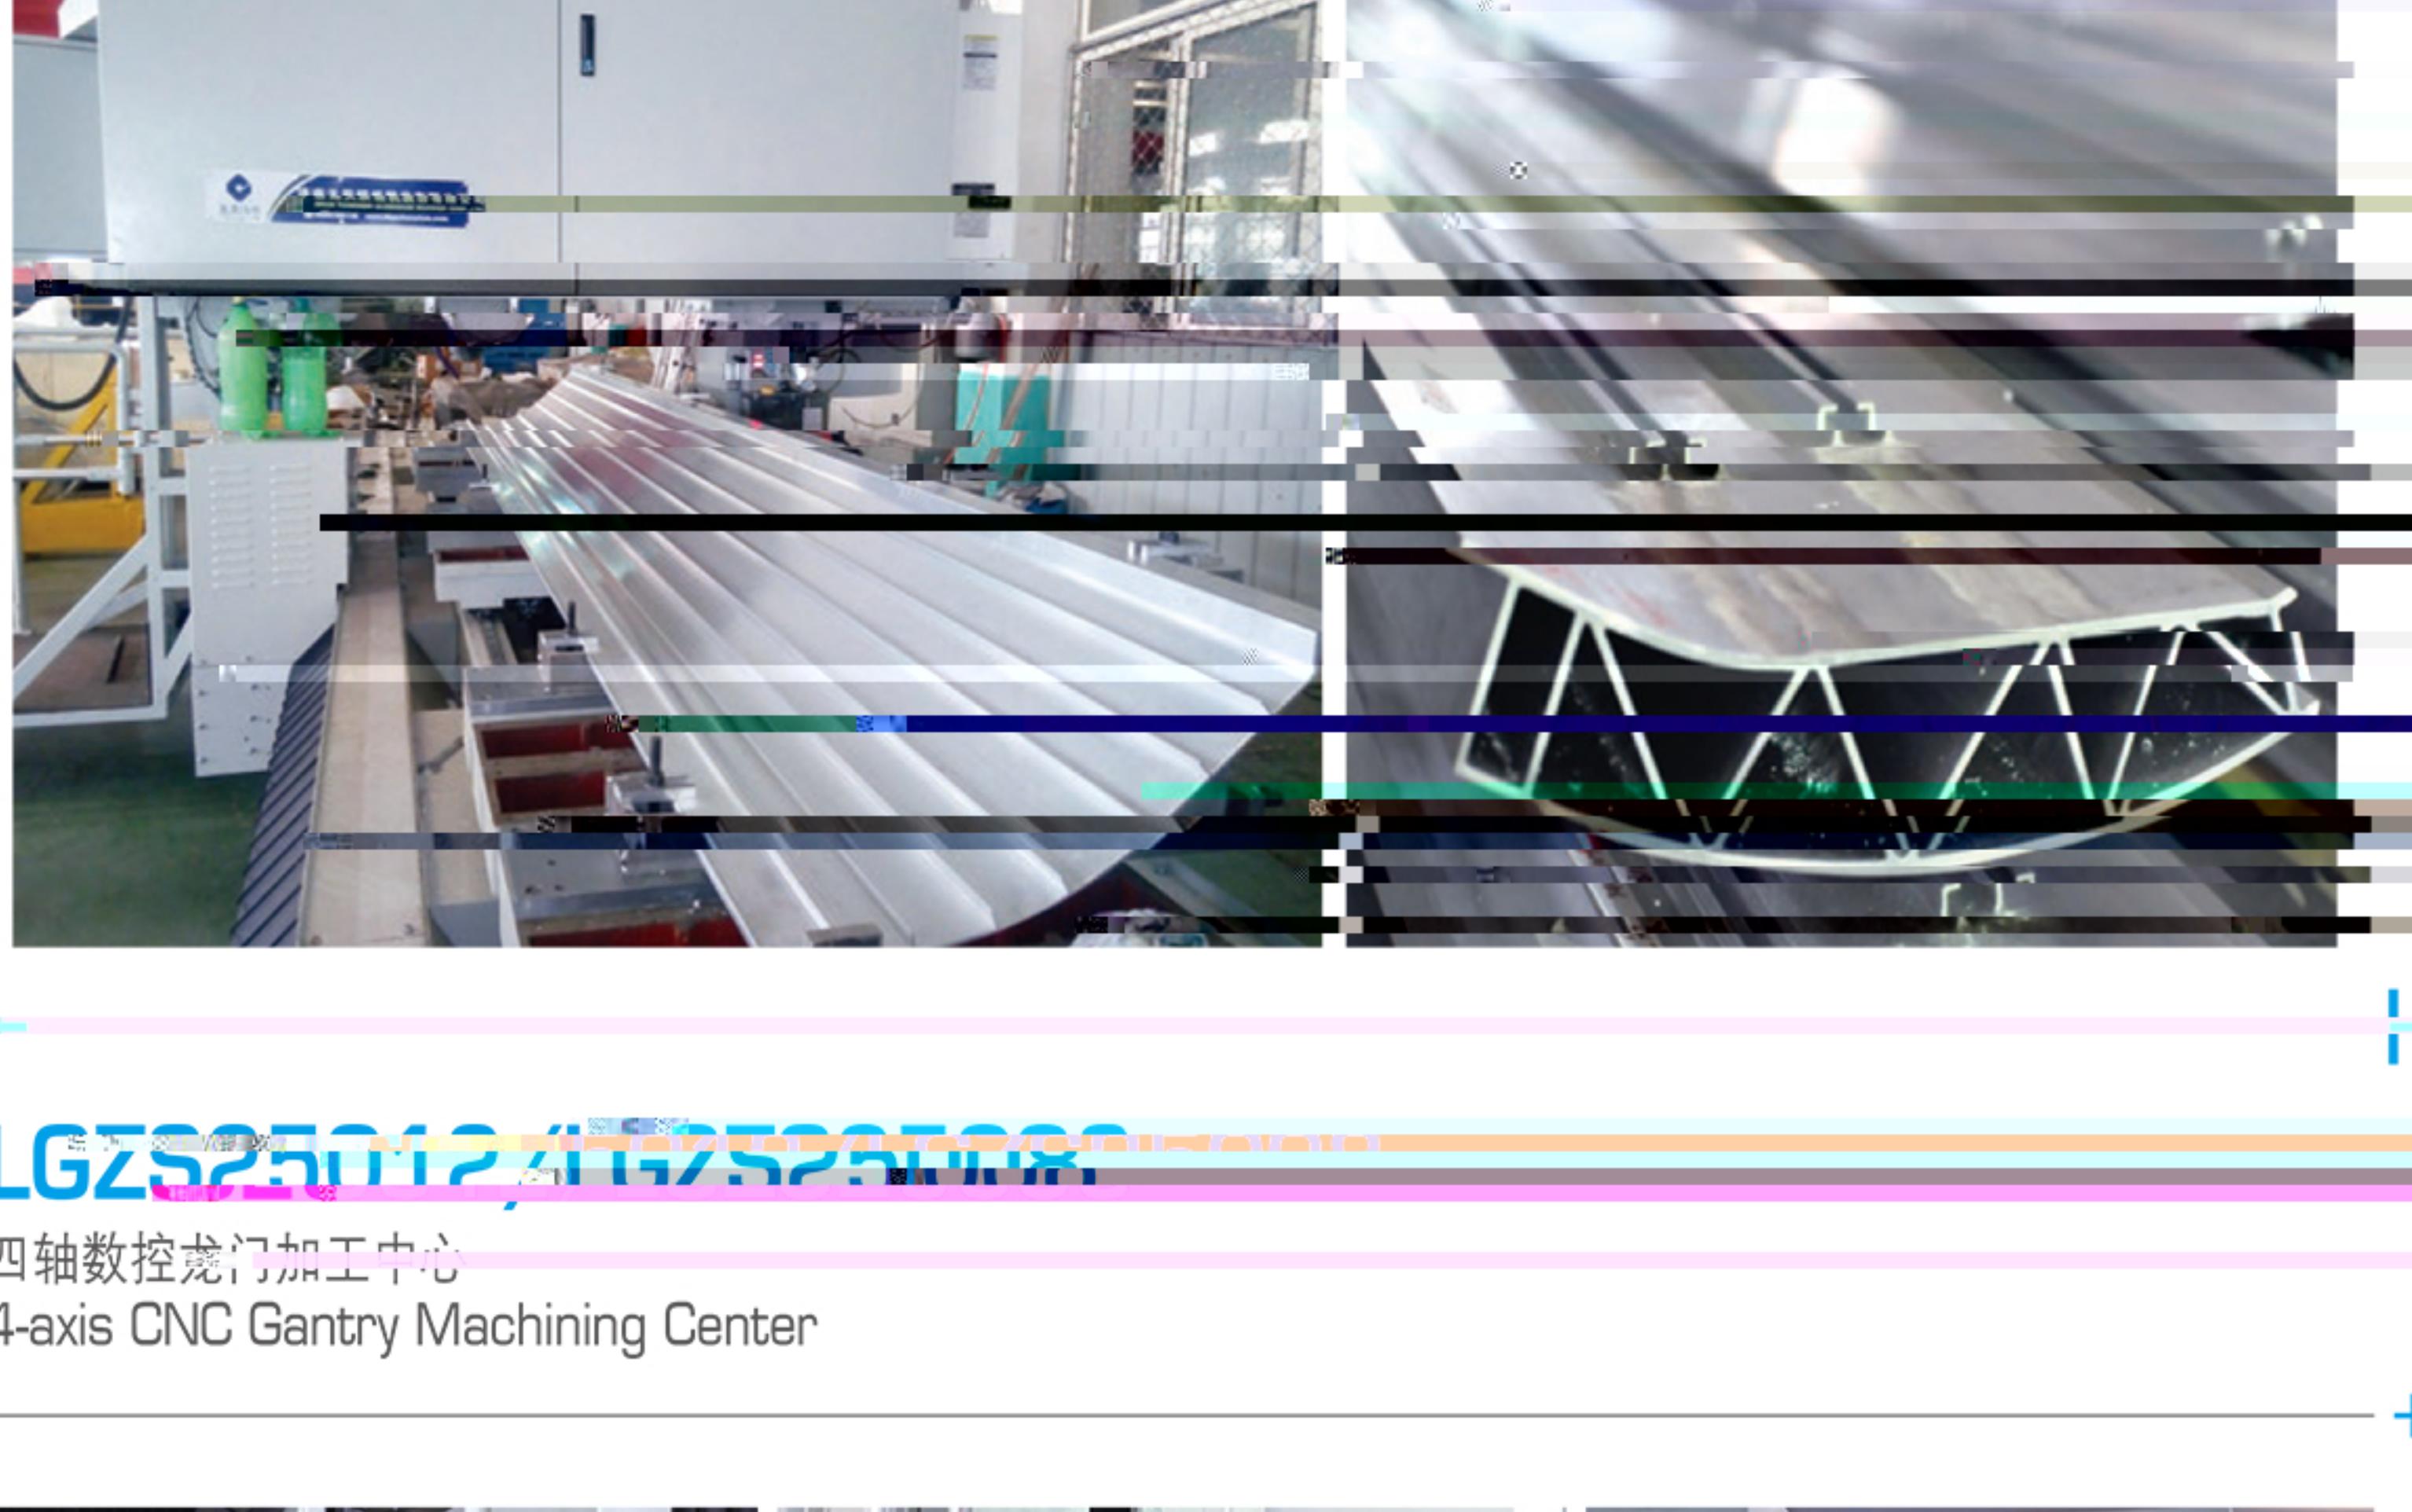

## 设备简介

LGZS25012/LGZS25008 四轴数控龙门加工中心是本公司针对轨道交通铝型材和各种工业铝材的加工，专门开发设计的一款高精机、电、气一体化设备。该加工中心刚性足、速度快、主轴兼顾转速高和低速大扭矩的特点，具有很高的加工效率，并且根据轨道交通铝型材长度大的特点，做了针对性的特殊设计，使得该设备可以满足最长 25 米工件的高效加工。

## Introduction

LGZS25012/LGZS25008 Four-axis CNC gantry machining center is a special machine tool equipment to meet rail transit aluminum profile and all kinds of industrial aluminum processing. It has features with rigid enough, high work speed, single high speed and high torque speed with large torque. It made a special design according to the characteristics of large length of rail transportation aluminum profile. Max processing length can reach up to 25m. And also it can be equipped cutting unit or right angle cutting tool head to finish product at one time.

## LGZS25012/LGZS25008

四轴数控龙门加工中心

4-axis CNC Gantry Machining Center

采用意大利原装高速电主轴。  
该型设备具有四个伺服控制轴，可以完成较为复杂的四轴联动加工。

It adopts high-speed electric main axis, which is imported from Italy.  
The machine has four servo-controlled axes to complete more complex four-axis linkage processing.

采用龙门移动式结构布局，减小占地面积增加整机灵活性和结构刚性。

配置 12 刀位旋转刀具库，可以完成自动换刀。

It adopts a moving gantry layout, which reduces the footprint and increases the overall rigidity of the machine.

The cutter storage supply 12 cutter positions, the cutter can change quickly and automatically.

采用先进的德国西门子（或日本发那科）数控系统，伺服电机驱动，高精度滚珠丝杠连接精密直线导轨，确保设备具有较高的加工精度和可靠性。

Using advanced German Siemens (or Japanese FANUC) CNC system, servo motor drive, high precision ball screw connection, precise linear guide rail to ensure machining accuracy and reliability.

## 技术亮点

- 适用于轨道交通铝型材和各种工业铝材的孔、槽及轮廓形状等复杂工序的加工，具备钻削、锯切和镗孔等功能。
- 设有刀具的冷却喷雾系统，确保机床的可靠运转和精度稳定性。
- 配置24组可移动调式自动夹紧单元，重复精度高并具有牢固可靠性。
- 配置电气箱空调，提高电器元件的可靠性及使用寿命，确保控制系统稳定运行。
- 配置有安全防护装置，确保操作者的人身安全。

## Features

- It used to process hole, slot and contour shape on rail transit aluminum profile and all kinds of industrial aluminum profile. It has function of drilling, sawing and boring etc.
- Cutting tool cooling spray system to ensure reliable operation and accuracy of machining tools.
- It equipped with 24 group movable and adjustable auto clamping in order to ensure high repetition accuracy and safety.
- It equipped with electrical box air conditioning to improve reliability and service life of electrical components.
- It equipped with safety device to ensure safety of the operator.

超长车体型材加工 Long train body profile processing

## 技术参数 Technical Parameters

项目	Item	规格 Specification
行程 Travel	X轴行程 (X轴)   纵向行程 (X-axis)   Y轴行程 (Y-axis)	LGZS25012 *** LGZS25008 *** 25000mm 1520mm
	Z轴行程 (Z轴)   垂直行程 (Z-axis)	700mm 625mm
工作台 Worktable	A轴行程 (主轴摆动)   A-axis travel (swing axis)	-90° ~ 0 ~ +90°
	二节工作台 Type   二节工作台   双节工作台	Movable
X轴 X-axis	X轴   X-axis	25000mm
	Y轴 (主轴区) Y-axis   Y-axis (spindle vertical)	1520mm 1120mm
加工范围 Processing range	主轴中心到工作台面距离   Distance between main spindle center to worktable	13~713mm... ~55mm
	主轴水平 (±90°) 时，主轴端部最大间距   Main axis horizontal (±90°), maximum distance of spindle nose	1106mm 740mm
	主轴竖直时轴端距工作台最大距离   Maximum distance of spindle nose	255mm... 420mm
快速移动速度 Move speed	X轴快移速度   X-axis	55m/min
	Y轴快移速度   Y-axis	20m/min
	Z轴快移速度   Z-axis	20m/min
	*A轴快移速度   A-axis	16.5m/min
主轴 Spindle	主轴锥孔/刀柄规格   Taper hole/handle spec	HSK63k HSK63F No.
	主轴转速和功率   Main speed	15kw 10kw
	主轴最大输出扭矩   Max output torque / rev	17190Nm/mm 123700Nm
刀库 Tool magazine	X/Y/Z/A轴进给电机扭矩   X/Y/Z/A Feed motor torque	1.27x20.6/16.4/5.0/2.71/1.0/0.5 N.m
	刀库容量   Tool magazine capacity	12把(可完成自动换刀) Automatic tool change
其它 Other	气源压力   Air pressure	5~6(kgf/cm²)
	润滑油箱容量   Lubricating oil tank capacity	3L
	电器总容量   Total electrical capacity	45kVA 35kVA
	机床净重   Net weight	28000kg 28000kg
NC系统 NC system	西门子或发那科数控系统   Siemens or FANUC CNC system
